

# Customer Support FAQ

Common questions about products, orders, and troubleshooting

## Orders & Delivery

### **Q: How do I track my order?**

A: You will receive a tracking email within 24 hours of dispatch. Use the link in that email or visit [track.sloffelectronics.co.uk](https://track.sloffelectronics.co.uk) with your order number.

### **Q: Can I change or cancel my order after placing it?**

A: Orders can be amended or cancelled within 2 hours of placement by contacting [support@sloffelectronics.co.uk](mailto:support@sloffelectronics.co.uk). After this window, the order will have entered fulfilment and cannot be modified.

### **Q: My order shows delivered but I haven't received it.**

A: First check with neighbours and your building's reception. If still not found, contact us within 7 days of the delivery notification. We will raise an investigation with the courier and resolve within 5 business days.

## Laptops — Troubleshooting

### **Q: My SloffBook won't turn on.**

A: Hold the power button for 10 seconds to force a reset. If still unresponsive, connect the charger and wait 15 minutes before trying again. If the issue persists, contact warranty support.

### **Q: My SloffBook battery drains very fast.**

A: Go to Settings > Power & Battery and enable Battery Saver mode. Check for background apps consuming power. If battery health drops below 70%, contact us — this may be covered under warranty.

### **Q: The keyboard on my SloffBook Pro 15 has stopped responding.**

A: Restart the device first. If keys are still unresponsive, boot into Safe Mode to rule out software issues. If the problem persists in Safe Mode, this is a hardware fault — raise a warranty claim.

## Smartphones — Troubleshooting

### **Q: My SloffPhone X12 Pro overheats during charging.**

A: Use only the original SloffCharge Pro 65W adapter. Third-party chargers may cause thermal issues. Avoid using the phone intensively while charging. If overheating continues with the original charger, stop use and contact support immediately.

### **Q: My SloffPhone camera is producing blurry photos.**

A: Clean the camera lens with a dry microfibre cloth. Restart the device. Check if the issue exists in third-party camera apps. If the built-in camera app is blurry but third-party apps are not, perform a factory reset after backing up data.

### **Q: How do I transfer data from my old phone to my new SloffPhone?**

A: Use the SloffMigrate app available on Google Play and the App Store. The app transfers contacts, photos, apps, and settings over Wi-Fi in under 20 minutes.

## **Account & Payments**

### **Q: How do I create a Sloff Electronics account?**

A: Visit [sloffelectronics.co.uk](https://sloffelectronics.co.uk) and click 'Sign Up'. You need a valid email address. Accounts allow you to track orders, manage warranties, and access exclusive member pricing.

### **Q: Is my payment information stored securely?**

A: Sloff Electronics does not store card details. All payments are processed via Stripe and comply with PCI-DSS Level 1 standards. We support 3D Secure authentication for all card transactions.
